#### Useful maps and images

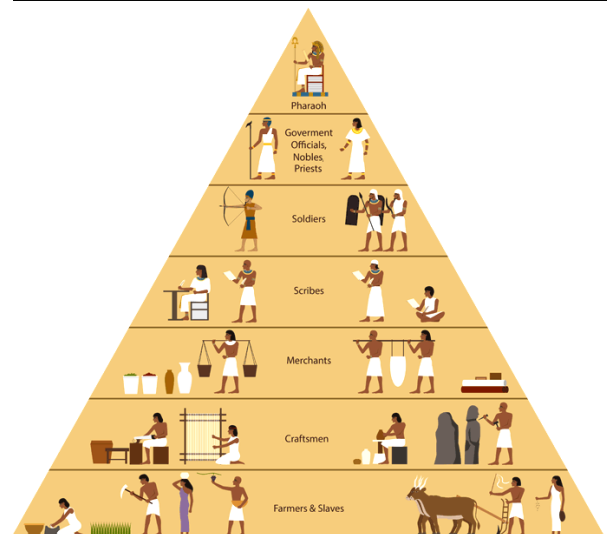

Area near the River Nile that flooded was known as the **Black Land**. Areas further away were known as the **Red Land**. They relied on the Nile's flood to grow crops and farm.

The **River Nile** is about 6,670 km (4,160 miles) in length and is the longest river in Africa and in the world. Fertile soil along the banks of the river were used to produce food for themselves and their animals.
